# INTRODUCTION

The expenditures shown in this publication are not all inclusive. Additional information on total operational costs in selected foreign countries are available in applicable DoD Comptroller Budget Exhibits.

## IMPORTANT - PLEASE NOTE:

**This is the last printed edition of the *Atlas/Data Abstract for the United States and Selected Areas* publication.** In accordance with the November 1997 Defense Reform Initiative to move to paper-free business operations, future editions of this publication will only be available through the Internet. All tables of the publication will be posted on the DIOR web site on a quarterly basis and available for "print on demand" by the users. The DIOR web site address for locating this publication is: <http://web1.whs.osd.mil/mmids/pubs.htm>.

## INTRODUCTION

### BACKGROUND

From 1955 to 1982, the Department of Defense (DoD) published the *Map Book of Major Military Installations*. This book gave DoD managers a convenient reference to locate major military installations in the United States. In the late 1970's, officials in the Office of the Secretary of Defense suggested that the geography information in the *Map Book* be combined with the financial and personnel data so that a wide range of information about DoD would be available in a single publication. A prototype of this new book, in 1981, resulted in the first *Atlas/State Data Abstract*, in 1982, and included geographic, financial, and personnel information for the fifty states. The 1984 edition was expanded to include selected U.S. Territories and Possessions, and the 1986 edition added selected foreign countries.

### ATLAS

The *Atlas/Data Abstract for the United States and Selected Areas* includes information on DoD military and civilian work force strength levels, payroll outlays, grants, and prime contracts over \$25,000, by state, District of Columbia (DC), Guam, Puerto Rico, and selected foreign countries. The information is presented with statistical tables on the right hand pages and corresponding maps on the facing pages.

In the first set of tables, personnel and expenditure totals are displayed for DoD, Army, Navy and Marine Corps, Air Force, and Other Defense Activities. The personnel part of this set contains a breakdown of active duty military, civilian, and Reserve and National Guard for the fifty states, DC, Guam, and Puerto Rico. The foreign countries show military and civilian dependent information instead of Reserve and National Guard personnel figures. The expenditures part of this set is broken down by payroll outlays, grants, and prime contracts over \$25,000, and subsets of these categories as applicable.

In the next set of tables, the top ten major locations of expenditures and personnel are shown in descending order. These locations are depicted on the maps on the corresponding facing pages. These tables are not included in the selected foreign countries since location information is not collected.

In the remaining two tables, contract awards over \$25,000 for the last three fiscal years and the top five contractors with their major areas of work are depicted for each state or country.

### COVERAGE

The information in the *Atlas* pertains to the Department of Defense, which includes the Departments of the Army, Navy, Air Force, and the category "Other Defense Organizations." This category includes the Office of the Secretary of Defense, Joint Chiefs of Staff, Inspector General (DoD), U.S. Court of Appeals for the Armed Forces, Uniformed Services University of the Health Sciences, Defense Agencies, and the Defense Field Activities. All information shown is as of September 30, 1997.

## **PERSONNEL**

Personnel data include total active duty military, direct hire civilian, Reserve and National Guard (fifty states, DC, Guam, and Puerto Rico), and military and civilian dependents (foreign countries).

### **Active Duty Military**

The active duty military personnel counts include those based ashore and exclude those temporarily shore-based, in a transient status, or afloat. As of September 30, 1997, 214,031 military personnel were excluded based on these categories. Reserve/National Guard personnel called to active duty under Title 10, United States Code 12304, are not included in the active duty military personnel counts.

There are a few cases where personnel are reported by the parent installation and shown there instead of their actual operating location. There are also cases where personnel on temporary duty as of September 30, 1997, are reported at the installation where they are temporarily assigned. In using this publication, please be aware that cases such as the foregoing can occur.

### **Civilian**

Included in the *Atlas* are U.S. citizen and foreign national direct hire civilians. Excluded are all indirect hire civilians and a small number of direct hire civilians formerly exempt from Office of Management and Budget ceiling control, such as Summer Aids, Stay-in-School Program employees, and participants in the Cooperative Education Program. As of September 30, 1997, the excludable strengths for these categories of civilian employees were: 39,866 indirect hire civilians and 1,863 direct hire civilians.

Although personnel assigned to military functions account for more than 96% of the DoD civilian work force, we have included strength data on civilian personnel involved in civil functions of the United States. As of September 30, 1997, there were 25,948 employees of the Army Corps of Engineers, 82 Army cemetery employees, and one Air Force employee, all assigned to civil functions.

### **Reserve and National Guard**

The Reserve and National Guard personnel figures include only the Ready Reserve, which consists of the Selected Reserve, the Individual Ready Reserve, and the Inactive National Guard. Personnel in the Selected Reserve are distributed to the capital city of the state in which their duty is performed. Personnel in the Individual Ready Reserve and Inactive National Guard are distributed according to capital city of their state of residence.

### **Military and U.S. Civilian Dependents**

Included in the foreign countries of the *Atlas* are counts of military and U.S. civilian dependents. Military figures include both command and non-command sponsored dependents. Dependents are defined as spouse, children, parents, and other persons related by blood, marriage, or adoption, and any person recognized as a dependent by the appropriate DoD Component.

## **EXPENDITURES**

The expenditures in the *Atlas* are not all inclusive. Additional information on total operational costs for foreign countries are available in applicable DoD Comptroller Budget Exhibits.

### **Payroll Outlays**

For civilians, active duty military, and reserves, payroll outlays represent the gross earnings of these personnel for services rendered to the Government and cash allowances for benefits. Excluded from these outlays are the employer's share of employee benefits, accrued military retirement benefits, and most of the permanent change of station costs. Payroll outlays for retired military, including reserves, represent the direct compensation to those personnel.

For purposes of this publication, payroll outlays have been allocated, to the best of our ability, to the actual location of the person being compensated. In most cases, the outlays are actual payroll calculations at the location of the personnel being compensated. In some cases, the outlays have been prorated from a central paying office to remote locations. In other cases where it is not possible to prorate, the outlays are reported at the location of the finance office issuing the checks. This could mean, for example, that military and civilian pay for the same installation may be reported at different locations if they are paid by different finance offices. Also, payroll outlays for military personnel who are temporarily shore-based or afloat are reported at their home port. Therefore, in using this publication, please be aware that anomalies of these types can occur.

### **Prime Contracts**

Prime contract awards include obligations for those contract actions over \$25,000 only. Contractual obligations for less than \$25,000, such as small purchases, are reported in summary form and are not attributable to locations or major areas of work.

In reporting contract awards, there can be deobligations (credit actions) as well as obligations (debit actions). An example of this would be where a contract had to be terminated. Although rare, this can result in a net credit for a particular location in a given fiscal year, but will be a positive result over time. Net credits are shown as negative amounts. Similarly, the amount of prime contract dollars for a major area of work can exceed the total amount for a given prime contractor. This occurs when there is a large deobligation on another contract for the same contractor.

Prime contracts are generally reported at the location where the work is performed. For example, if a contractor is located in Nevada and wins a construction job in Utah, the contract will be reported in Utah. However, there are exceptions, such as when contract work is performed at various plants or locations, the contract is reported to the location where the largest dollar amount of work will be performed. Another exception is in contracts for transportation and communications services where the place of performance is the location of the contractor's home office. Furthermore, for purchases from wholesale or other distribution firms, the place of performance is the distributor's business address and not the place where the products or goods were manufactured.

### **Grants**

Included under the "Grants" expenditure category, introduced with the 1995 edition of the *Atlas*, are financial data related to obligations of funds by grants, cooperative agreements, or other nonprocurement instruments. Obligations of any dollar value are listed at the location reported as the place of performance.

## **MAPS**

The maps are displayed on the facing pages of the statistical tables and show where major payroll, grant, and contract expenditures are incurred and major concentrations of military and civilian personnel are located, or both. Locations are included if they show major expenditures for the current year, or any one year in the past three years. Also included are all major military installations, regardless of expenditures or numbers of personnel, with the exception of public works centers and installations dedicated to reserve activities, unless expenditures or numbers of personnel caused these activities to be listed as major installations. To reduce congestion on the California maps, installations with less than 1,000 military and civilian personnel have been excluded. The maps of foreign countries show selected places for geographical reference only. Expenditure information is reported at the country level and apportionment by place is not possible.

Beginning with the 1993 edition of the *Atlas*, major military installations within the United States, closed as a result of the base closure review and recommendation process, are shown with their actual closure dates in the following sample format: (6/93-C). Foreign bases are removed from applicable maps when all of their facilities are returned to the host nation.

## **INTERNET AVAILABILITY**

Information presented in the *Atlas* is available through DefenseLINK or directly through the DIOR World Wide Web site (<http://web1.whs.osd.mil/mmids/pubs.htm>).
